

Best Doctors®

ELITE DIAGNOSTIC IMAGING

TESTIMONIAL

“...saved me a lot of pain and discomfort for an extended length of time...”

“I had surgery on my right knee some time ago but I was again having a great deal of problems with that knee. My doctor told me I needed an MRI before any treatment recommendations could be made. He also told me to expect a wait of up to six months for the imaging to be done.”

“Pengrowth Corp. very recently added Best Doctors Elite Imaging Diagnostic Service to our employee benefits package, so I called Best Doctors.”

“It took only three days from the time of my call for the whole thing to transpire. I called them on Monday and I had the MRI done on Thursday. Unbelievable!”

“Shortly after the MRI, I had an appointment to see the same orthopaedic surgeon who had operated the first time. That time the problem was of a more minor nature. The MRI showed that it is an ACL (anterior cruciate ligament) problem for which I have already begun physiotherapy hoping that will avoid further surgery.”

“The Best Doctors Elite Diagnostic Imaging Service saved me a lot of pain and discomfort for an extended length of time by being such a quick service. I know that the service would have cost over \$500 to have an MRI privately on my own here in Alberta, but I didn’t pay anything. The Best Doctors service is awesome!”
