

TESTIMONIAL

66 It enabled my doctor to make the diagnosis. 99

I had spent a year trying chiropractors, massage therapists and acupuncturists, none of whom were successful in relieving the pain I was experiencing. My spouse's employer augmented their benefits package with a new service called Best Doctors Elite Diagnostic Imaging Service. When she told me about this new benefit and that she had enrolled us in it, I decided to use it to try to locate the source of my pain.

I scheduled an appointment with my family doctor on a Thursday and was given an MRI requisition and placed a call to Best Doctors. The next day I received a call from a Member Advocate, a registered nurse at Best Doctors, who had scheduled an MRI for me at a private clinic for the following Tuesday!

Because my family doctor was unsure whether the source of my problem was in my back, hip or knee, I required two MRIs. These would have cost me \$1,500, but, as a member of the Best Doctors Elite Diagnostic Imaging Service, I paid nothing; the entire cost was paid by Best Doctors.

I was also very impressed with the MRI Clinic. Immediately after the procedures, I was able to view the images and was given a DVD of the MRI images to take to my physician. This enabled my doctor to make the diagnosis of a herniated disk, a torn ACL and a torn meniscus and to arrange referrals for me to appropriate specialists for treatment.

Thanks to the ability of Best Doctors Elite
Diagnostic Imaging Service to arrange the MRIs
so quickly, I now not only know the cause of my
pain, but the wait time to see an Orthopedic
Surgeon and a Neurosurgeon has been reduced
by half. I feel so fortunate to be a member of this
amazing service.
